SHUBHAM RANA

Senior Software Engineer

Karnal, Haryana, India | +91-8295182910 | shubhamrana.tech@gmail.com | linkedin.com/in/shubham-rana-b76a041b6 | github.com/Shubhamrana01

PROFESSIONAL SUMMARY

Senior Software Engineer with 5 years of experience delivering enterprise web applications using Java, Spring Boot, and Angular with PostgreSQL, SQL Server, and Oracle. Currently modernizing legacy systems for Honda North America at LTM, including invoice-approval workflows. Built microservices, batch processing solutions, and authentication systems at Infosys supporting multiple Fortune 500 clients. Experienced across the full software development lifecycle from requirements gathering to production deployment using Agile and Scrum methodologies.

TECHNICAL SKILLS

Programming Languages: Java 8, Java 11, Java 17, JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frontend Technologies: Angular 14+, Angular CLI, RxJS, NgRx, PrimeNG, Bootstrap, Material UI, Responsive Design

Backend Technologies: Spring Boot, Spring MVC, Spring Security, Spring Batch, Spring Data JPA, Hibernate, REST API

Databases: PostgreSQL, Oracle, SQL Server, MySQL, MongoDB, Query Optimization, Indexing

Security and Authentication: OAuth 2.0, OpenID Connect, IBM OIDC, JWT, RBAC, Spring Security

Architecture and Design: Microservices, RESTful Services, API Gateway, Module Federation, MVC, Design Patterns, System Design

Cloud, DevOps and Integration: Google Cloud Platform (GCP), OpenShift, GitOps, Helm, Microsoft Graph API, Azure AD, Git, Jenkins, CI/CD, Docker, Maven

Automation: Batch Processing, Cron Jobs, ETL, OData API, MFT, XML, JSON, Scheduled Tasks

Testing: JUnit, Mockito, Integration Testing

Legacy Systems: JSP, Servlets, Legacy Modernization

AI-Assisted Development: GitHub Copilot, Claude, Prompt Engineering, Token-Efficient Prompting, AI Agent Workflows

PROFESSIONAL EXPERIENCE

Senior Software Engineer | LTM, India **January 2025 - Present**

Project: Advanced Electronic Manifest (AEM) - Legacy Modernization | Client: Honda North America

- Leading legacy modernization, migrating a JSP/Servlet Java application and COBOL mainframe batch jobs to Angular 14 with Spring Boot microservices and PostgreSQL, serving ~500 users.
- Converted COBOL batch processes into Spring Batch microservices with CRON jobs and parallel, chunk-oriented execution, eliminating manual intervention and reducing nightly batch runtime.
- Built an IBM OIDC authentication and RBAC system managing 10+ user roles with varying permissions.
- Created a multi-tier approval workflow engine with dynamic routing and configurable business rules, with instant notifications cutting approval turnaround from days to hours.
- Extended the invoice-approval workflow with a new "Division Cost Analyst" delegation role, updating the TypeScript status-determination logic, Angular UI stage detection, and the delegation roles configuration.
- Resolved cross-stack delegation management issues, including Angular race conditions, backend transactional email failures, and a PostgreSQL unique constraint that failed to account for division/department scoping.
- Integrated SharePoint document storage for invoice attachments via Microsoft Graph API, using certificate-based Azure AD authentication with credentials secured through OpenShift secrets, automating document upload and transfer that was previously done manually.
- Developed 20+ reusable Angular components with TypeScript for consistent UI patterns across the application.
- Designed RESTful APIs connecting external MFT systems for automated data transfer.
- Use GitHub Copilot and Claude with structured, token-efficient prompting to speed up coding, reduce review cycles, and apply AI agent workflows responsibly for day-to-day development tasks.

Technologies: Java, Spring Boot, Spring Batch, Angular 14, TypeScript, PostgreSQL, IBM OIDC, OAuth 2.0, Microsoft Graph API, Azure AD, OpenShift, REST API, Git, Jenkins, Jira

Technology Analyst | Infosys Ltd., India **September 2021 - January 2025**

Project: Infosys Data Service Suite (IDSS) and Client Integration Solutions

- Developed a dynamic XML and JSON query generator from nested XSD structures, helping to acquire 2 new enterprise clients.
- Connected the QAD ERP API with IDSS for data migration, handling large daily record volumes.
- Owned the SuccessFactors integration module: built OData API connections between SuccessFactors and SQL Server/Oracle, set up ETL jobs that load Excel data, transform it in the ETL tool, and push it into SuccessFactors through a scheduled workflow, and fixed bugs raised against these integrations.

- Managed data migrations for 5+ clients, moving millions of records between SQL Server and Oracle.
- Adopted Micro Frontend architecture using Module Federation, enabling independent team deployments.
- Rebuilt the Operations Portal backend, optimizing data retrieval patterns to reduce response times, and wrote unit tests to improve code coverage and reduce code smells.
- Set up CI/CD pipelines using Jenkins and DevSecOps, reducing deployment time from hours to 30 minutes; automated SSL certificate management and handled Windows Server deployments, releases, and troubleshooting.
- Mentored 3 junior developers on Angular, Spring Boot, and Agile workflows.

Technologies: Java, Spring Boot, Angular, TypeScript, SQL Server, Oracle, REST API, OData, SuccessFactors, Jenkins, Git, Jira, XSD, XML, JSON, Windows Server

PROJECTS

Student Management System | Java, Spring Boot, Angular, MySQL

- Built a student data management system for Rediff CAD, Karnal, with automated certificate generation and receipt issuing.
- Developed REST endpoints for student records with basic authentication.

Wanderlust Travel Application | Spring Boot, Angular, PostgreSQL, Bootstrap

- Built a travel package search platform with filtering by destination, budget, and dates.
- Designed a responsive UI and integrated third-party APIs for package data retrieval.

CERTIFICATIONS

- Google Cloud Associate Data Practitioner - Google Cloud | Verify on Credly
- GitHub Copilot Associate - GitHub | Verify on Microsoft Learn
- Infosys Certified Angular Professional - Infosys
- Infosys Certified Spring REST Professional - Infosys
- Infosys Certified DevOps Professional - Infosys
- MongoDB SI Associate - MongoDB University

EDUCATION

Master of Computer Applications (MCA) | DIT University, Dehradun **June 2021**
CGPA: 7.4 / 10

Bachelor of Science in Computer Science | Chandigarh University **May 2019**
CGPA: 7.6 / 10

ADDITIONAL INFORMATION

Open to relocating within India and considering international opportunities. Notice period: 90 days. Open to remote and hybrid work.

Languages: English (Fluent), Hindi (Native)
